Gunjan Kawale

Data Engineer | SQL | ETL & Data Warehousing

Nagpur, Maharashtra, India | +91 9209252226 | gunjanworkspace@gmail.com | linkedin.com/in/gunjan-kawale

PROFESSIONAL SUMMARY

Data Engineer with experience in SQL development, ETL, data warehousing, data migration, and workflow automation. Currently rebuilding production Redpoint workflows in Azure Logic Apps, with output reconciliation, SQL stored procedures, API integrations, and workflow monitoring.

TECHNICAL SKILLS

ETL & Data Warehousing: Redpoint, SSIS, ETL pipelines, data warehousing, data integration, data migration, data validation, output reconciliation

Cloud & Automation: Azure Logic Apps, Azure Blob Storage, Azure Function App API integration, workflow automation

Databases: SQL Server, Oracle SQL

Development: SQL queries, stored procedures, query optimization, XML/JSON, CSV/TXT processing, debugging, workflow logging, error handling, testing

Tools: Git, code reviews, Postman, log-tracking dashboards

PROFESSIONAL EXPERIENCE

Data Engineer Jun 2026 – Present

OneData Software Solutions | Client: Donnelley Financial Solutions (DFIN)

- Migrated 7–8 existing production workflows from Redpoint to Azure Logic Apps, rebuilding workflow logic and reconciling outputs against Redpoint to preserve existing automation behavior.
- Built a file-triggered workflow that processes CSV files, applies business rules using SQL stored procedures, archives input files, and generates two TXT output files.
- Developed scheduled Azure Logic Apps workflows that call Azure Function App APIs and use Azure Blob Storage.
- Configured triggers, SQL actions, API payloads, and workflow steps, mapping SQL query results to workflow variables.
- Implemented workflow-level and step-level logging, dashboard error tracking, and email notifications; investigated SQL timeouts in long-running workflows.
- Tested workflows, used Git for version control and code reviews, and supported deployment, documentation, and post-release monitoring.

Data Engineer Jan 2025 – Mar 2026

Helson Software Solutions Pvt. Ltd.

- Developed and optimized SQL queries for data extraction, transformation, and processing.
- Contributed to ETL processes supporting data integration and data warehouse operations.
- Supported data migrations, focusing on data consistency and accuracy during transfers between systems.

ETL Developer Jan 2023 – Dec 2024

OneData Software Solutions | Client: Donnelley Financial Solutions (DFIN)

- Built new Redpoint ETL workflows based on project and business requirements.
- Enhanced existing Redpoint workflows by adding features and modifying workflow logic; maintained workflows for ongoing data processing requirements.
- Troubleshot workflow issues and validated expected results through testing.

Associate – SQL DWH Development May 2021 – Nov 2022

Think Analytics India Pvt. Ltd. (Think360)

- Designed and maintained data integration solutions using SQL Server, SSIS, and ETL processes; optimized SQL queries for data processing and extraction.
- Supported data pipeline automation, data consistency, and data security.
- Contributed to data-driven client solutions, including work for ICICI Bank.

EDUCATION

Diploma in Advanced Computing (DAC): C-DAC Sunbeam Institute of Information Technology, Pune | Apr 2021 | Grade A

B.E. in Computer Science Engineering: Priyadarshini Institute of Engineering & Technology, Nagpur | RTM Nagpur University | 2019 | CGPA 6.48

ADDITIONAL LEARNING

ETL with Python & SQL, LinkedIn Learning (Jan 2026) | Databricks Fundamentals Accreditation (Jan 2026)
