GUNJAN KAWALE

AZURE DATA ENGINEER | DATA PIPELINES & CLOUD WORKFLOWS

gunjanworkspace@gmail.com · +91 9209252226 · Nagpur, Maharashtra · linkedin.com/in/gunjan-kawale

PROFILE

Data Engineer with 4+ years of experience developing ETL/ELT pipelines, cloud-ready warehouse solutions, data migrations, and workflow automation. Currently migrating Redpoint projects to Azure, building Logic Apps workflows, and maintaining wiki documentation with AI assistance. Experienced in processing 10M+ daily records, improving pipeline performance, and implementing validation and reconciliation practices.

CORE SKILLS

Data Engineering: SQL, ETL/ELT, incremental and delta loads, SCD Type 2, dimensional modelling, data warehousing
Cloud & Workflow: Microsoft Azure, Logic Apps, Redpoint, SSIS, workflow orchestration, REST APIs
Quality & Governance: Reconciliation, audit tracking, data validation, anomaly detection, regulatory reporting
Data Formats & Tools: JSON, CSV, SQL Server, SSMS, Git
Developing: Python

PROFESSIONAL EXPERIENCE

Azure Data Engineer | OneData Jun 2026 – Present

- Migrate existing data projects from Redpoint to Azure and develop new workflow automations using Azure Logic Apps.
- Create and maintain wiki documentation for migrated workflows, using AI to support documentation upkeep.

Data Engineer | Helson Software Solutions Pvt. Ltd. · Hyderabad Jan 2025 – Mar 2026

- Designed SQL-based ETL/ELT pipelines processing 10M+ daily records with zero data loss across structured and semi-structured sources.
- Engineered incremental and delta load frameworks that reduced pipeline runtime by 35–40%.
- Implemented monitoring, alerting, retries, and failure recovery, achieving 99.9% SLA compliance; added reconciliation and validation that reduced downstream reporting defects by 30%.
- Improved analytical query speed by approximately 25% through indexing, partitioning, and data model tuning.

Data Engineer / ETL Developer | Donnelley Financial Solutions · Coimbatore Jan 2023 – Dec 2024

- Integrated REST APIs, JSON, and CSV sources into relational data warehouses for batch and analytics use cases.
- Implemented audit tracking and data aging logic to support financial data governance and compliance reporting.
- Built reusable ETL templates that reduced onboarding time for new data sources by 25%; collaborated on dimensional models for BI reporting.

Data Engineer | Think360.ai · Mumbai May 2021 – Nov 2022

- Migrated 5TB+ of production datasets with SQL validation scripts, achieving near-zero downtime.
- Automated SSIS and SQL batch ingestion, reducing manual operational effort by 20%; improved retrieval performance by 28% through partitioning, indexing, and query optimization.

EDUCATION

Post Graduate Diploma in Advanced Computing · Sunbeam Institute of Information Technology, Pune · 2020–2021
Bachelor of Engineering in Computer Science · Priyadarshini Institute of Engineering & Technology, Nagpur · 2015–2019

CERTIFICATIONS

Databricks Fundamentals Accreditation (Jan 2026) · ETL in Python and SQL, LinkedIn Learning (Jan 2026)
